

## THE WORLD OVER

### CANADIAN BUFFALO DISAPPEARS

#### BOUGHS COINS IN VANCOUVER

#### GREAT BEAR LAKE AREA ACTIVE

#### 5-YEAR TERM TRADE PACT PLAN

#### Dr. VALERO MAY ABOLISH SENATE

A Canadian buffalo and an Australian calendar appear to disagree as to just which is the winter months. At least that is the case with one member of that animal family who was sent from his native home in Canada to part Adelaide in Australia, several years ago. The buffalo so far has persisted in garbing himself in a winter coat in an Australian summer, and promptly sheds it at the beginning of an Australian winter. This is due to the fact that the Australian seasons occur at opposite ends of the calendar to those of Canada, and the authorities are wondering when the animal will adapt her change of attire to the altered conditions.

The 50-cent piece is in a fair way to pass out of use as legal tender in Vancouver until the final of current felt coins of that denomination is stamped. One large corporation is stated to have taken in more than \$100 worth of the spurious money, while other reports acceptances of sums from \$15 to \$25. A number of persons detected passing the coins have been questioned by police, but in each case it was obvious that they had accepted them innocently.

One of the biggest deals negotiated in connection with Great Bear Lake properties was made this week in Edmonton when W. A. Murphy of Calgary purchased 42 claims, aggregating approximately 2,500 acres on the east side of Lindsay Bay, adjacent to the holdings of Major Harebush and Chas. C. Sloan, and Bear Exploration and Radium groups.

The price paid is reported to be in the neighborhood of \$100,000. Mr. Murphy had previously been interested in oil, having financed some of the larger Turner Valley companies.

The Empire commission is moving towards a five-year plan.

Trade agreements negotiated in the proposed, shall have a minimum duration of five years and shall then be terminated at six months' notice on either side. The Canadian-Australian

## WHEAT IS DOWN FROM GENERAL RAIN IN ALB'TA

### Wheat Cutting Getting Under Way Now

The rain storm that we mentioned as approaching last week materialized and was a matter of twelve hours duration. The next morning was a sultry one for most of the farmers in the district when they looked out over their wheat fields only to find them down flat as a result of the rain. The heavy heads coupled with the weight of the rain was too much for the big crop, and as a result work will be more plentiful in the district.

The rain will not damage much of the grain according to farmers, but it will make harvesting much more difficult, as nearly every field has been affected.

Many farmers in the district are now cutting wheat and large loads of binder twine are beginning to move out to the fields of operation. It has been estimated that it will take between four and five pounds of twine per acre to tie the bundles and there should be a shortage of the product in the district before harvest is over. The banks are now letting out money for twine and orders for this product are being shipped rapidly.

Every day now sees a number of the farmers in town making their necessary harvest purchases and the Batur's night shopping hours are again appearing like old times. Optimism is high and prospects are bright for good crops with plenty of work attached, so that the pessimist will not have so much time to broadcast his tale of woe.

An agreement, to extend the agreement now existing, has virtually reached the printing stage, although the final conditions of the Canadian-British trade agreement have not been made public yet, on account of not being completed at the time of going to press.

Steps to curb the power of the Free State Senate, and possibly to do away with the upper chamber entirely, are being contemplated by the Hon. Mr. Valero. This action shows that Valero's attitude towards the Senate when it refused to pass the Oil Bill recently.

## PASSES WITH HONORS

The following news item was taken from the *Black Hills Herald*, and may be of interest to many of our readers.

"Miss Marjorie Birch has recently been advised that she has passed her elementary grade examinations. Toronto Conservatory of Music with honors.

Marjorie is the daughter of Mr. and Mrs. H. Birch, who resided in Carbon a few years ago. Mr. Birch is now the agent for the Crown Lumber Company at Hanna.

## BROWNLEE SAYS CREDIT SYSTEM DUE TO CHANGE

### Brownlee Tells Drumheller Farming Rally State Medicine Coming

#### DEFENDS PROVINCIAL POLICY

#### Declares Taxation Rates in Alberta Are Lowest West of Lakes

(From Calgary Alberta)

Prophesying that before the end of three years, no one in the Dominion of Canada would dare to criticize the Wheat Pool or other efforts toward economic co-operation, Premier John Brownlee, who addressed a gathering of 150 farmers at Drumheller last Saturday afternoon, took a stand in defence of his government's policies and financial administration.

Premier Brownlee also took a definite stand in the question of credit, money and currency inflation.

"If you are frightened of socialism, turn back twenty years and think what the advocates of our present public services would have said. Our public health system, in this province today in the form of a prediction they would have brought forth a cry of 'Communist' and 'Radicals'."

"Twenty years ago we hardly knew anything about the Factories Act, the Workmen's compensation, Old Age Pensions, Mothers Allowances, State Medicine, while unemployment was not considered a state responsibility. State medicine is coming, and Alberta is leading the way," he declared.

Premier Brownlee prefaced his address with an appreciative reference of the efforts various Boards of Trade in bringing the citizens of the urban centres and rural districts together, in the spirit of co-operation and good will. He stated that, while the people of the province were naturally interested in matters of foreign policy, national defence, money and currency, they were going to continue the school and get the schoolchildren to take of the crops.

Favors Inflation

The premier approved his opinion that the credit system of Canada was due for a change and he was, in his private conviction, in favor of holding the present position. The premier, he added, is already suffering all day under inflation and enjoying none of the advantages. The question of going off the gold standard he considered one of serious consideration by the country's best brains, but many of the reactions of the day he thought it would be inadvisable for provinces to handle alone; as instance, succession duties which varied in different provinces.

In defence of the Government of Alberta the premier complained that it had been subject to attack by some who endeavored to take advantage of the mental state of the public in times of depression. But, he went on, the fact remained that the province is being administered with the lowest taxation of all provinces west of the Great Lakes and he challenged critics to show where there had been extravagance or waste. It was true, he interjected, that there was being spent than ten years ago, but this was inevitable if the province was to be commensurate with advance.

Debt had increased, for instance, by the construction of a road system surpassed only by those of Ontario and Quebec, he went on, answering the criticism of the provincial Conservative leader at the Sylvan Lake meeting, and as to the charge that the present government had "taxed the farmer out of existence" he cited that taxes generally were lower than in other western provinces.

Turning to Turner Valley as an example, the premier stated that the problem of waste gas was handled to his government by the Dominion government. "Turn to your municipal police and you will see that the price of oil stocks were away down before the Alberta government had anything to do with the natural gas situation." He claimed the wells were becoming dried in the Turner Valley field as fast as gas was being pumped out, and that his conservation scheme was a term of years, there would be the same value of natural gas as was sold.

## SIX SHIPS TO MOVE BAY GRAIN

With six boats already chartered to carry grain from Canada's new artificial seaport, Churchill, this summer, as many more will be available as are needed to carry the cargo offered. This announcement has been made by Mr. Thomas Harling, Montreal steamship agent.

The announcement comes at a moment when late date as many anxiety has been felt throughout the country, because the crop was ripening fast and many farmers were not in the position to secure bank financing on their own responsibility. However, applications for twine loans are now in order and may have already been put through the usual routine.

Under this year's provisions the borrower will be required to make the cheque payable direct to the dealer, securing a statement from him as to the actual amount delivered. Such an arrangement leaves small hope of financing machine repairs.

## POOL WILL NOT COLLECT OVER-PAYMENT, 1929

### Statement Issued By Alberta Wheat Pool

Definite denial was made by Premier Brownlee in a statement recently made at Edmonton, of rumored plans of the Wheat Pool to collect from this year's crop certain losses sustained in previous years. Premier Brownlee's comments to the *Edmonton Journal* was as follows:

"I have been surprised to hear that rumors are again being circulated throughout the province with respect to the Wheat Pool, to the effect that an attempt will be made to make up the losses in connection with the 1929 crop by deductions from this year's crop. The Wheat Pool is coming crop season.

"I wish to again state, as I did last year, that there is no truth whatever in the suggestion. The agreement between the government and the Wheat Pool, as ratified by the Legislature, provides for certain fixed payments for a period of twenty years. No attempt whatsoever will be made to collect any sum from the various growers as individuals, but we fully expect the Pool will be able to make its annual payments out of its total earnings."

Sixty-eight transients dropped off one incoming freight train on Tuesday evening. Most of the visitors passed through on later trains, although a few were engaged for harvest help at the prevailing rate of \$1.50 per day—Helen Herald.

## ALBERTA NEWS

Thirty-two hundred carloads or 15,000,000 pounds of binder twine are the estimated requirements for filling up the wheat crop of Western Canada this year, according to the latest reports. In terms of relatively this amount of twine is equivalent to 2,043,072 miles of string to go around the earth about 89 times.

Gravel is reported laid on the Hanna Calgary highway to a point ten miles east of Morris. The work is proceeding steadily, but some delays have been encountered due to break-downs in the crushing equipment.

The hum of the harvest and combines will be heard around the district next Monday. With the hot weather of the past week the grain is ripening very fast. The wheat will average between 30 and 40 bushels to the acre—Gleichen Call.

Edmonton—Premier Brownlee stated on Thursday that he had not received the resolution endorsed by the U.F.A. executive at Calgary, requesting a special session of the Legislature this fall to deal with farmers' debts.

At a meeting of the miners employed in the Newcastle Mine Drumheller, on Wednesday night last, it was decided that men would not answer the call for work Thursday. The strike was called.

According to an announcement made recently by Hon. Fernan Baker, minister of Education, the three Normal schools in this province will be maintained this year.

Carl Axelson, prominent leader of the Farmers' Unity League and well-known throughout the rural communities of the province for his "stumpings" on behalf of the organization, was found dead at his farm at Hinesville, about 50 miles north of Medicine Hat, Monday morning. Indications are that Axelson had committed suicide, for he was found hanging from the rafters of his barn with a noose around his neck.

## PARTY AT HESKETH

Four of the wranglers, Jim Stafford, Bill Thorburn, Dick Appleby and George Casper gave a very enjoyable party in the Hesketh hall on Friday, August 12. The party was attended by the younger set of the Carbon district and a few of the parents. Music was supplied by Jim Stafford, assisted by Mrs. L. Brown. Mr. McNaughton acted as master of ceremonies and gave two enjoyable recitations. Everyone attending reported a good time.

\$6.00 CONTRIBUTED FOR NAVY LEAGUE

Rallying to support the Navy League of Canada in its work of assisting the widows and orphans of the merchant marine, Carbon citizens subscribed \$6 to this cause in a recent campaign conducted by Fred Cooke, organizer of the Alberta Division.

The *Saltine* magazine published quarterly, may be obtained by the payment of \$1.00 per annum in addition to your donation to our funds. The result for the magazine is \$2.00 per annum.

## NOTICE TO CREDITORS

In the Estate of Ambros Crak alias Oak Lake of the Village of Carbon in the Province of Alberta farmer, Deceased.

All persons having claims against the estate of the above mentioned, who died at Dryden in the District of Keewatin, on January 26th, 1932 are requested to file proof of same with the undersigned on or before the 16th of September 1932.

After that date the Public Trustee in this cause will distribute having regard only to the claims of which he shall then have had notice.

Dated at Toronto 29th day of July 1932.

A. N. MIDDLETON,  
Public Trustee,  
Osgoode Hall,  
TORONTO.

## ALBERTA POOL ELEVATORS

### Announcement

Alberta Pool Elevators will be operated during the current crop year in the same manner as in the past, that is, that no payment will be taken from the proceeds of any grain delivered to any these Wheat Pool members to give receipt delivery of grain from any person.

Alberta Wheat Pool members are given the option of disposing of their grain under any of the methods provided by the Canada Grain Act and obtaining the full current market price for same; or disposing of their wheat on pool basis, accepting the prevailing initial payment, and participating in any future payments that may accrue from the pooling thereof.

Definite assurance is given that no deductions for Elevator Reserve or Commercial Reserve, or for payment of the 1929 crop year, will be taken from the proceeds of any grain delivered for pooling or for immediate sale during 1932-33 crop year.

It should be clearly understood by Pool members that the statements recently sent out covering the member's position on the 1929 crop year are merely for the information of the individual member. These statements are not a demand for repayment of the 1929 overpayment in any respect.

## A Separate Grade For Garnet Wheat Is Sought By British Milling Interests

Continuation of the policy of permitting Garnet wheat to be milled with Marquis and Reward varieties, or of marketing it as No. 1 and No. 2 Northern wheat will react sharply against all wheat sales from Canada, in the opinion expressed by William Smith, chief grain buyer and miller for the Scottish Co-Operative Wholesale Society.

The British miller, he stated, had found the Garnet variety unsuitable for milling purposes in Britain. At a recent meeting of the milling and grain interests held in London a decision was taken which called for the special grading of Garnet wheat as distinct from the other Canadian wheat varieties.

"It is to the interest of the Canadian wheat producers to see that this separate grading is undertaken," stated Mr. Smith. "The British buyer of wheat is determined that when he purchases grain on the Canadian market that the commodity supplied him will be either No. 1 or No. 2 Marquis or Reward. Any purchases of Garnet variety would only be bought on the strict understanding that it is of this variety, and at a price considerably below that paid for the other standard Canadian varieties."

Reasons given by Mr. Smith for the objection of British millers to Garnet wheat were that it is lacking in protein values and also that its baking qualities lack strength and stability as compared with the Marquis and Reward varieties.

Mr. Smith was definite in his statement that he did not wish to be construed as advocating the non-growing of Garnet. "This may be the best type of wheat to grow in this country, but, for its successful marketing, it must be labelled what it is and not be placed on the market as holding grade with the other Canadian varieties."

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other channels, and there is no assurance to them that the wheat bought will be the required Marquis or Reward varieties.

A further factor, said Mr. Smith, which must be considered is that the continuance of a policy of not grading the Garnet wheat may result in definite lowering of the price of all Canadian wheat on the British markets.

### Lets Electricity Do It

Farmer-Legislator Uses Modern Method To Remove Stumps

When J. W. Berry, member for the Delta in the British Columbia legislature, wants to remove stumps from his big farm near Langley, he just turns a switch and lets electricity do the work.

Approaching the stump with an electrically-driven auger, the stump expert pierces each of the large roots to a depth of about nine inches, then the holes he pours a spoonful or so of gasoline and cylinder oil. Blasts of air are introduced into the holes through iron pipes attached to rubber hose.

The oil mixture is touched off with a match and soon the entire middle part of the stump is incandescent as the heat is being eaten away by the flames. Air is forced under electrical pressure through the iron pipes so the fire is maintained under forced draught until the whole of the stump is destroyed.

**New Natural Gas Producer**  
A large flow of natural gas has been struck in the Kinsella field southeast of Edmonton, Alberta. The new producer is reported to have a flow of 7,000,000 cubic feet per day.

A new bathing "suit" has been designed, in which, after it has been used, the wearer can float for hours.

### Hard Task For Doctor

Valuable Snake In London Zoo To Have Glass Eye

Fitting a snake with a glass eye is the delicate operation which faces a doctor when he works on a huge Madagascar boa in a London zoo.

Some time ago this rare and valuable boa became blind in one eye. It was found that the eye was badly damaged and causing much pain.

The offending eye was plucked out, and the snake's normally good spirits returned. But the boa had lost much in beauty. Therefore, a suitable glass eye has been selected, and will be fitted in.

### New Pastime For Blind

Invention Enables Sightless Persons To Do Crossword Puzzles

A London doctor has made an invention whereby the blind can do crossword puzzles and acrostics. The inventor is Dr. F. W. Alexander, a former medical officer, and the inspiration came to him as he passed a laundry.

The invention is based on the Braille reading system for the blind, and it is composed of a laundry-board studded with male denoting groups of the alphabet. Numerous games can be played on this device.

### Latest Scientific Wrinkle

Ink Spot Picture Used To Analyze Human Brain

Ink spots are the latest scientific wrinkle by which psychiatrists can examine the human brain and determine whether individuals are normal or abnormal.

Hundreds of tests made by Mrs. David Ralph Hertz, wife of Cleveland Commissioner Hertz of Cleveland, have established positively that reactions of individuals to ordinary ink spots can be used by psychiatrists to analyze them.

There is nothing mysterious about the spots, even though their use seems to lean toward black magic. Every school child has dropped a dab of ink on a piece of paper, folded it and then guessed what it looked like.

And that procedure is exactly the one Mrs. Hertz follows. She is working in conjunction with Samuel Beck of Boston. Beck is making charts of the reactions of abnormal people to the reactions of normal human beings.

"Of late the only bugaboo," she said, "Hundreds of more examples will have to be taken. But this test of mine has proved the process is practical."

Mrs. Hertz first tested 300 children in a junior high school. Using 10 ink spots, she showed the subject to look at each spot for two minutes, jotting down verbatim everything said.

Then she compared the answers with hundreds of others she got from special groups of psychoneurotics, maladjusted girls and feeble-minded. By finding the normal for each special type, Mrs. Hertz can work backwards and positively classify an unknown case.

Normal people seemed to see animal and insect life in the spots. Psychoneurotics were sensitive to color in some spots and most of them saw parts of the human body in the spots. The feeble-minded visioned far-fetched likenesses. With a natural aptitude to social tenets, the maladjusted girls made their first remarks about the white spots left by the ink as it spread. "That's called perseverance."

Well Known "Mrs. Grundy"

Famous Character Came Into Existence in English Play

That famous character "Mrs. Grundy," came into existence in a play called "Speed the Plough," written by Thomas Morton and produced some hundred and thirty years ago. In this play one of the characters has a habit of dragging her neighbour, Mrs. Grundy, into everything she says.

At last her husband bursts out: "It is always 'What will Mrs. Grundy say?' 'What will Mrs. Grundy think?' 'Actually, Mrs. Grundy never appears on the stage! But the constant reference to her opinions appealed to the public fancy and she still survives as a stickler for the proprieties."

## Additional Sites Recommended For Marking By Historic Sites and Monuments Board

### Archaeologists May Be Making Great Discovery

Believe Manger So Long Overlooked Is Not True One

Excavations started after an accidental discovery are expected to reveal the manger in which Christ was born.

A two-hour's stroll at the Church of the Nativity at Bethlehem has been shown for centuries as the manger, but the new excavation seems to show that tradition has been mistaken.

Though it is agreed that the Church of the Nativity, the oldest Christian building in the world, stands on the site of the inn where Mary and Joseph sought shelter, not all authorities agree the manger now venerated to be the actual one.

The Church of the Nativity actually is a series of monasteries and churches of three sects—Coptic, Latin and Armenian—under one roof. Below the transept, reached by a circular staircase, is the Grotto, or Chapel of Nativity.

The pavement in the underground Grotto was broken. After discussions between the three sects it was arranged that the public works department of the government should replace the flagstones.

When the workmen removed the old stones and started digging, they were surprised to find the remains of some former building.

The antiquities department in Jerusalem were called in, and, walls, pillars, doors and stairs were revealed. Government archaeologists are now sinking shafts at three places.

It is thought by some experts that the remains found are part of the original church erected by Constantine the Great, the first Christian emperor, in the year 330. These parts, apparently, were covered by Justinian, who made alterations two centuries later.

A new pavement has been found and a subterranean vaulted roof. Through this massive roof is being sunk a shaft into what may be the actual manger, the stable portion of the inn where Mary and Joseph sought shelter after they had been refused admission to the inn "because there was no room for them."

The archaeologists now working at Bethlehem are not prepared to make any statement until all the remains have been uncovered and exhaustively studied. Experts feel to make a statement, however, believe them to be on the eve of the greatest discovery ever made by archaeology.

### The development of interest in historic sites and landmarks throughout Canada has increased greatly in the past few years, mainly as a result of the excellent work being carried out by the Department of the Interior on the recommendation of the Historic Sites and Monuments Board of Canada. The Board, which recently concluded its annual meeting in Ottawa, was formed in 1910 with the sanction of the Minister of the Interior, to advise the department on the preservation of such monuments and sites as were considered of pre-eminent national interest. The chief objects in view were the education of the nation in the history of the country, the stimulation of patriotism, the commemoration of the deeds of those who bore a significant part in the exploration, defence and development of the country, and in addition the preservation as national property of sites having outstanding historical interest.

The first meeting was held in October, 1919, and the name "Historic Sites and Monuments Board of Canada" was adopted. It is a body composed of eminent historians chosen with a view to having representation from all parts of Canada, is honorary in character. The recommendations of the Board are carried out by the National Parks Branch, Department of the Interior, Ottawa. Up to the present time 150 sites have been marked with a standard bronze label approved by the Board.

Among the sites recommended for marking at the recent meeting of the Board,

WORLD HAPPENINGS  
BRIEFLY TOLD

The Rotterdam dock, one of the largest on the Clyde, has been temporarily closed on account of decline of shipbuilding.

Divided on the common stock of Canadian Pacific Railway for the first six months of 1932 is not being paid at present.

The Church of Scotland plans to build 30 churches in the next seven years, 10 of which will be in Edinburgh and five in Glasgow.

Representatives accompanying the Japanese Olympic team plan to buy the cabin of each athlete from that country who wins an Olympic title.

Newton, Mass., one of Boston's wealthiest suburbs, has nearly 20 automobiles for every family. There are 14,000 families and 23,000 automobiles.

Florenz Ziegfeld, New York theatrical producer, who died recently in California, bequeathed his whole estate to Billie Burke, his widow, and Patricia, their daughter.

An air-taxi was chartered from Imperial Airways by a London woman for a return flight to Chelmsford, Essex, where she placed a wreath on a grave in the churchyard.

Art and agriculture are the only creative professions in the world, says John Erskine, novelist. "By artists I mean all craftsmen who are creators," he said, "and by agriculturists I mean all those who produce and create wealth from the soil."

San Francisco's new \$6,000,000 opera house, the first of the new opera houses in the United States, will be formally dedicated next month as a memorial to the city's victims of the earthquake of 1906.

Inductive, it is said, of an improved human outlook, the protection of the British Columbia government by null men against export of logs. Loggers, however, contend that they are in a position to satisfy all demands of the mill men as well as taking care of any export trade being offered.

## Britain's Unemployed

Seven and a Half Million People Depending On Government Aid

A wandering army of unemployed youths, vaguely reminiscent of the United States bonus army, is making its appearance in Great Britain as a result of increases in the number of jobs announced as 2,311,792. "Unemployment has made approximately one-fourth of Britain's 6,000,000 population dependent to some extent on government aid, for fully 7,500,000 men, women and children are existing wholly or partly on government or local relief in addition to the official total of jobs."

As a result of the latest official figures, an increase of 94,438 in the month of July, and of 94,432 in the last year, the nation's relief machinery is scarcely able to cope with the situation.

## Limit To Cattle Exports

Less Than 25,000 Head May Be Shipped To England Next Year

Less than 25,000 head of cattle would be shipped to the United Kingdom next year from Canada, even if the restriction now imposed against Canadian cattle landing in Britain were lifted. This estimate was made in an interview recently by Hon. Robert Weir, Canadian Minister of Agriculture.

Reports which have gone out that the lifting of the restrictions would result in Canada shipping from 100,000 to 400,000 head annually to Britain are regarded by Mr. Weir. These reports would tend to ruin the British farmer with fear that his home market would be flooded by Canadian cattle, while no such danger really exists.

A material that does not stop the ultra-violet rays from the sun, is as valuable as glass, and as fragile, has been made from natural gas.

Barber: "Your hair is getting thin on top sir. Have you tried our new hair tonic?"

Customer: "No, it isn't that!"

Safe-breaker at home: "I should hate to open my own safe any other way"—Musketeer, Vienna.

## Make Interesting Discovery

Canadian Scientists Gain Knowledge Of Universe Of Great Importance

New knowledge of the universe, related to be of tremendous potential importance in the scientific world, has been gained by Prof. J. B. Foster and Dr. A. Albert Douglas, McGill scientists who returned to the university following a month's research work conducted at the Dominion Astrophysical Observatory at Victoria.

Professor Foster decided to claim full success for their achievements until he and Dr. Douglas have had time to re-study their findings. He said, however, that the results of their work would give likely create an upsurge of opinion among European scientists.

The two McGill scientists set themselves to examine the electrical fields of stars.

They conducted observations both at Victoria and at Pasadena, Cal. Only one day was spent at the latter place.

## Victorian Order Of Nurses

Miss Snellie To Visit Europe To Study Maternal Welfare Work

In recognition of the comprehensive programme of maternal welfare carried on by the Victorian Order of Nurses for Canada, the Rockefeller Foundation has extended to Miss Elizabeth Snellie, its chief superintendent, an invitation to visit a number of European countries within the next few months for the purpose of studying conditions of maternal welfare there.

Miss Snellie expects to sail early in September, visiting England, Denmark, Austria, Germany and Italy, and returning to Canada about the middle of December.

## Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which has been in existence for some time, is now in a position to satisfy all demands of the mill men as well as taking care of any export trade being offered.

In 1929 the "Lemoyne" took on a cargo of 371,850 bushels of wheat, the crop of approximately 40,000 acres, the more than 62 square miles of prairie land. In May 1929 she established a world record for the carriage of coal by taking aboard 16,538 tons and carrying it to Fort William. In May 1929 she established a world record for the carriage of coal by taking aboard 16,538 tons and carrying it to Fort William.

Six hundred and thirty-three feet long, with a seventy foot beam, a depth of twenty-nine feet and a registered tonnage of 10,480 tons the "Lemoyne" will be by far the largest ship ever to have entered Lake Ontario and will clear the way for the carrying of the great bulk of the wheat crop of the prairies to the ports of the east by water. The "Lemoyne" along with other ships of her type will no longer be confined to the Upper Lakes; her eastern terminus becomes Kingston, Ontario, and her east to west, cruising radius more than one thousand miles.

During the last twelve months the Welland Canal has seen a series of new records established. Last year the S.S. Noronic, upper lake passenger liner and flag ship of the Canadian Steamship Lines, northern fleet, established the first of the series of records when she made her first voyage into Lake Ontario and visited the ports of Toronto, Hamilton and Kingston for the first time. On that occasion over one hundred thousand people from these three cities went aboard the "Noronic" and the walls of the canal were lined with thousands of people during her historic cruise. The "Noronic" at that time was the largest vessel of any type to go through the canal and remains the largest passenger steamer to have entered Lake Ontario. Her length is about half that of the "Lemoyne."

Following the establishing of this record by the "Noronic" are the lake freighters of the Canadian Steamship Lines set these new marks for

## Largest Grain Carrier

Boat That Is the Pride of Canada's Inland Waterways

World's largest grain carrier, holder of all Great Lake freight records and pride of the inland waterways, the S.S. Lemoyne of the Canadian Steamship Lines fleet, officially opened the new Welland Ship Canal on August 6. Officiating at the ceremony was His Excellency the Earl of Bessborough, Governor-General of Canada, and delegates from all parts of the Empire attending the Imperial Conference in Ottawa.

Designed and built by Canadian Steamship Lines at their own shipyard at Midland, Ontario, in 1926, the "Lemoyne" is considered a triumph of Canadian achievement and the heart of Canadian shipyards.

Since she first took the water she has captured all the major honors of the Upper Great Lakes freight carriers. Her records go even beyond freshwater for she has carried in single cargoes more grain and more coal than has ever been moved in any other single ship.

In 1929 the "Lemoyne" took on a cargo of 371,850 bushels of wheat, the crop of approximately 40,000 acres, the more than 62 square miles of prairie land. In May 1929 she established a world record for the carriage of coal by taking aboard 16,538 tons and carrying it to Fort William.

Six hundred and thirty-three feet long, with a seventy foot beam, a depth of twenty-nine feet and a registered tonnage of 10,480 tons the "Lemoyne" will be by far the largest ship ever to have entered Lake Ontario and will clear the way for the carrying of the great bulk of the wheat crop of the prairies to the ports of the east by water.

The "Lemoyne" along with other ships of her type will no longer be confined to the Upper Lakes; her eastern terminus becomes Kingston, Ontario, and her east to west, cruising radius more than one thousand miles.

## Oldest In the World

Antient Skull Is Found While Excavating In London

The oldest known human skull belongs to a London woman, G. Elliot Smith, professor of anatomy at the University of London, stated at a meeting of the international congress of pre-historic and proto-historic skulls, he said, "and was found in blue clay 40 feet below the surface during excavations for the new home of the City of London in Leadenhall Street. It belonged to a woman about 50 years old, who probably was left-handed."

After considering all the evidence and carefully studying all the facts known about the skull, Professor Smith said, he decided the London skull represented the earliest known remains of homo sapiens, giving it place of honor over the Java man, the Peking man, and all other pre-historic skulls.

The other attendants at the congress expressed great surprise over the announcement and left the hall immediately after the presentation of the skull and discussed the problem.

Do you keep your money in an outside or an inside pocket? asks a male fashion writer. No.

## SUNDAY SCHOOL LESSON

AUGUST 21

THE TENT OF MEETING

Golden Text: "Jehovah spoke unto Moses face to face, as a man speaketh unto his friend."—Exodus 33:11. Lesson: Exodus, chapters 32, 33. Devotional Reading: Psalm 5:7-9.

Explanations and Comments

The Place and Purpose of the Tent of Meeting, verses 7-11.—These verses describe the gateway way in which Moses performed his high priestly service during the wilderness life, before the tabernacle was erected. At every new encampment he used to take the tent, a special tent which he called the "Tent of Meeting," and have it set up by itself, far from the camp. Similarly, after the settlement in Canaan, the local sanctuary of God was beyond the towns and villages. The tent was especially sacred, for there Moses and Jehovah might come with his perplexities and receive the answer from Jehovah.

When his duties were over, Moses returned to the camp, but the tent was constantly guarded by his assistant, a young man named Aaron. When Moses had returned on Mount Sinai, the people had complained to Aaron that "for us up out of the land of Egypt, we know not what has become of him," and this new arrangement was better for the people for they could follow him with their eyes till he entered the Tent. When they saw the pillar of cloud, the symbol of the Divine Presence, hover over the door of the Tent, each man sitting and watching at the entrance of his own tent, would rise up and worship. And Jehovah spoke with "Prayer is more than meditation. It is a dialogue. It is not enough that we speak to God; he must be able to hear and, in some way, speak to him again. And one of the most welcome and surprising features of the Bible is that it is even more of God's speech to men than of man's to God."—John E. McFadyen.

Within the "Tent of Meeting" Jehovah used to speak unto Moses face to face, as a man speaketh unto his friend. The expression, "speaking face to face," was never used in the Bible to mean that of man's to God. "John E. McFadyen reminds us, to watch the mind gradually transcending its earlier limited conceptions of God. 'Sometimes the higher the view may be, and the more within the same chapter. A profounder view than in verse eleven. A few verses later on, 'Thou canst see me and I thee.' As still more fervent spiritual view occurs in Deuteronomy 10:17, where it is urged with great emphasis, as if in opposition to popular conception. 'Ye only heard. A voice, ye saw no manner of form.' 'Prayer is the psychological act by which the soul comes into conscious contact with God.'—Robert F. Horton.

We have too little praying face to face with God every day. Looking back at the end, I suspect there will be great grief for our sins of omission—omission to get from God what we might have had by prayer."—Andrew Bonar.

According To Supply

The doctor was giving a lecture to a class of girls.

"Also," he remarked, "I have been told that the human body contains sulphur."

"Sulphur?" exclaimed a pretty young girl. "And how much sulphur is there in a girl's body?"

"Oh, the amount varies," said the doctor smilingly, "according to the girl."

"Ah," remarked the girl. "That's why some of us make better matches than others."

## Naval Armaments

Difficult To Distinguish Between Defensive and Offensive Weapons

Why all this bother about "offensive" and "defensive" naval weapons at Geneva? Is the submarine offensive? Are battleships, mine-layers and bombing planes defensive?

There is one simple rule by which every case can be decided: Is your fellow's weapon is extremely offensive, your own is purely defensive.

Ask any schoolboy or baseball fan. The human gas bottle is the most innocuous of objects, quite inoffensive. Only prejudiced persons like the umpire could possibly construe it as offensive. It takes the post-shooter. Whoever heard of a schoolboy that used this mild little weapon for attack?

As any boy knows, the use of the post-shooter, like the water-pistol, are solely for the warding off of attacks by others, especially those armed with post-shooters.

And so it is with submarines and like. The gentle U-boat regarded the Q-boat as highly offensive, whereas all know it to have been purely protective. During the war, some of us harbored dark thoughts about submarines. Quite unjustly, I remember, since the French and Japanese thesis. The undersea boat has become the Poor Nation's friend, the cheapest naval weapon for frightened off-offensive, according to its backers.

The sad truth is quite evident. Weapons are defensive or offensive according to the uses to which they are actually put. When you have decided who is the offender, and who is the defender, then, perhaps, you may decide whose weapons are offensive. Meanwhile, most nations seem to proceed on the principle that if a club is used by three clubs and a machine gun are twice as defensive.

—Montreal Star.

## Testing Out New Device

Invention May Prevent Flying Students From Freeling Controls

A new device to overcome the danger of flying students "freezing" the controls of aircraft in a panic has been developed by engineers of the Department of National Defense and is now undergoing thorough tests.

An arrangement whereby the instructor can engage the student's controls in flight was found unsatisfactory, because once the student had overcome his momentary panic it was necessary for the aeroplane to land before his controls could be connected up again.

The new principle under test provides a patented control stick that becomes automatically disconnected when too much pressure is applied to it and yet remains its usefulness when the student's grip relaxes. The instructor in the other cockpit is provided with a normal control stick and has control of the aircraft at all times. By pulling on his stick he can force the student's control out of joint.

Iceless Refrigerators

Colorado Farmers Have Inexpensive Means Of Keeping Food

Home-made iceless refrigerators are becoming unusually popular on many Colorado farms as an inexpensive means of conserving butter, milk, vegetables and fresh fruits, according to Mary Sutherland, extension economist in home management for the Colorado Agricultural College.

The iceless refrigerators are made by stretching either rust-proof screening or burlap over an empty crate. A covering of cotton flannel or some similar material is placed over the crate. The lower ends of the flannel covering are allowed to rest in a pan of water.

Capillary attraction keeps the cloth wet, and evaporation causes the refrigerator to remain at a low temperature.

"What's that you're putting in your shirt pocket?" asked Murphy.

"Dynamic," whispered Donovan.

"The waverer," said Murphy, "he meets me he slaps me on the chest and breaks my nose. Next time he does it he'll blow his hand off."

"Ah," remarked the girl. "That's why some of us make better matches than others."

## MONARCHIST REVOLT IN SPAIN IS SHORT-LIVED

Madrid, Spain.—Hitting monks in Seville took their vengeance on monarchist sympathizers for the short-lived revolt against the Republic, which collapsed when its leader, General Jose Sanjurjo, fled the city and was captured while trying to get to the border.

While the rioters were burning buildings and bombing houses in Seville, the government proceeded with "mopping up" operations against the revolutionaries and the rest of Spain gave itself over to public celebrations in honor of the young republic's hardiness in its first great test.

General Sanjurjo, who complained that "everybody abandoned me and my undertaking," was on his way to Madrid from Huelva, where he was arrested after he had asked a rural guard to show him the best way to Portugal.

President Niceto Alcalá Zamora presided over a lengthy cabinet session at which the punishment for the rebel general was discussed.

Nine buildings were burned by the Seville mobs. Among them were the offices of two newspapers—the "La Unión" and the church of San Fernando.

The rioters killed a civil guard near the Seville jail, which they attacked in an effort to liberate prisoners and to assault members of the civil guard held captive there because of participation in the revolt.

Shortly afterward, Premier Manuel Azana announced the general and all other officers and civilians connected with the revolution would be tried by the sixth section of the supreme court. This tribunal is devoted to military affairs.

The premier said he intended exterminating to the very roots the cause of the rebellion. "It would be unjust to those persons awaiting sentences on charges of sedition if the government allowed such crimes to continue," he said.

General Sanjurjo, who complained that "everybody abandoned me and my undertaking," after his revolt collapsed, was questioned lengthily at police headquarters here.

## Wheat Carry-Over

Slight Decrease Is Shown Compared With Previous Year

Ottawa, Ont.—The carry-over of wheat at the end of the crop year, July 31, was 130,948,901 bushels, compared with 134,078,963 last year, the Dominion Bureau of Statistics reported recently.

Canadian wheat in elevators and afloat in the United States amounted to 4,706,828 bushels, while 1,181,427 bushels of Canadian wheat were destined for foreign export ports. The comparable figures for these items at July 31, 1931, were 5,538,534 and 1,259,978 bushels, respectively.

The total amount of Canadian wheat in Canada and the United States at July 31, 1932, was 156,136 bushels compared with 140,877,275 bushels at July 31, 1931.

The final revision of 1931 wheat crop estimates is not possible until January, 1933, when the final figures for deliveries and platform loadings are made available by the Board of Grain Commissioners.

## Floods Take Heavy Toll

Hundred Thousand Chinese Homeless and Many Lives Lost

Harbin, Manchuria.—A hundred thousand Chinese residents of Harbin were forced by unprecedented floods to abandon their section of the city, which has become a vast inland sea.

Approximately 3,000 persons were reported missing in the valley of the Shanghai River, which has risen far above the level in 1914, when the Chinese experienced the worst flood in its history.

Harbin's Chinese residents have congregated in cemeteries and fields on the outskirts of the city. Many of them are without food, clothing and shelter.

Cholera is spreading in the district and the people are hoarding food as prices sky-rocket.

## May Finance Settlers

St. Catharines, Ont.—Possibility of 30 unemployed families of this city becoming pioneers of the Peace River district was seen if plans of the city council are completed. Under the proposal to families, financed with a maximum sum of \$600 each, provided by the municipal, provincial, and Dominion governments, would be established in Peace River.

## No Dairy Shipments

Lack Of Refrigeration Service May Prevent Export Over Churchill Route This Year

Montreal, Que.—Owing to the high price of the fuel used to power the little hose is held out that a refrigeration service will be available out of the port of Churchill, Man., to carry cream and cheese to Great Britain, at least this year, Thomas Harding and Co., steamship agents here, stated recently.

Efforts had been made western Canadian interests to obtain steamship service from the northern port for dairy produce, the company stated, but it was felt the rates would be too high to attract shippers. Vessels at present using the Hudson Bay route to carry grain do not have the refrigeration facilities necessary.

Western Canada last year shipped a considerable quantity of butter to the United Kingdom when exports of that commodity were required after a lapse of several years. Certain quantities of eggs and poultry are also shipped by the vessels by the west, the shipping made via Montreal.

Winnipeg, Man.—Officials of the On-to-the-Bay Association had little chance of making a sale on a Montreal deposit, saying it would be practically impossible to ship dairy products from the buildings were burned by the Seville mobs. Among them were the offices of two newspapers—the "La Unión" and the church of San Fernando.

The rioters killed a civil guard near the Seville jail, which they attacked in an effort to liberate prisoners and to assault members of the civil guard held captive there because of participation in the revolt.

## Double Taxation

Steps Being Taken To Remedy Grievous Situation

Edmonton, Alberta.—Recommendations from the conference of income tax officials of the four western provinces, which was held here, will go into effect to their respective governments to remedy the double taxation working methods having been agreed upon for joint adoption if approved. It is expected that the changes will amount to about next year's tax.

Provincial income taxes as affecting wage-earners are the chief point at which double taxation in the present system are desired. The superintendents of the four provinces are working on a way of avoiding the taxing of the same income twice. A number of cases were found in their operations of persons living in one province and working in another, and under the income tax laws as they stand at present the income of such persons is liable for taxing purposes in both provinces. This overlapping and double taxing will be remedied. It is understood that the suggestions of the superintendents' meeting are adopted.

## Research Laboratories

Two Thousand Guesses Attend Official Opening At Ottawa

Ottawa.—The handsome, bronze doors of the new national research laboratories swung open to 2,000 guests from the British Empire, announced the Hon. H. H. Stevens, Minister of Trade and Commerce for Canada, presiding. Speaking briefly, he called upon the Prime Minister, Rt. Hon. B. Bennett, to address the assembly.

After a short address, Mr. Bennett, his excellency, upon whom fell the duty of declaring the building formally opened.

## Quest For Blondes

Scientists Require Golden Hairs For Recording Humidity

Montreal, Que.—The McGill University physicist, Dr. H. H. Stevens, Minister of Trade and Commerce for Canada, presiding. Speaking briefly, he called upon the Prime Minister, Rt. Hon. B. Bennett, to address the assembly.

After a short address, Mr. Bennett, his excellency, upon whom fell the duty of declaring the building formally opened.

## Should Attend Travelling

St. Thomas, Ont.—Representation of the Dominion of Canada by a composite battalion of great war veterans at the unveiling of the Vimy Ridge, which may take place next year, was recommended by Col. Hercules Harre, Canadian trade commissioner to France.

## Kaye Don Will Race Again

Britain's Speediest Race Horse Hope Of Capturing Trophy

London, Eng.—Kaye Don, Britain's speediest racing sled and holder of a world record, will again be left here for Southampton to sail on the steamer "Majesty" for Detroit, where he will race against Gar Wood, the Harrower trophy.

A large crowd of cheering admirers bade him farewell. "I am making no promises," he said, "except this—I will do the best I can against Wood's boat, which has much more horsepower than my Miss England III."

By promising to do the best he can, Don meant he would try to reach again on the new Detroit course the two-miles-a-minute pace he set when he headed his sleekened power plant across Loch Lomond at an average speed of 119.81 miles an hour, with a top mark of 120.5 miles, the fastest any human has travelled over the water.

## CANADA'S SHARE OF BRITAIN'S WHEAT IMPORTS

Ottawa, Ont.—During the calendar year 1931 Russia supplied the United Kingdom with 24.3 per cent of the total wheat requirements while Canada's percentage was slightly higher at 25.2 per cent. A reasonable estimate in a special report on world trade in wheat, issued by the Dominion Bureau of Statistics, especially for the benefit of the Imperial Economic Conference, Russia's total exports of wheat to the United Kingdom in 1931 amounted to 94,010,295 as compared with total Empire imports to the United Kingdom of 94,948,376.

The total wheat requirements for 1931, of the United Kingdom, chief wheat importing country of the world, amounted to about 225,000,000 bushels. This was supplied mainly as follows: Canada, 59,982,000 bushels; Australia, 43,507,000; British India, 89,100; other British countries, 73,656; Russia, 94,010,295; Argentina, 38,701,734; United States, 15,576,000; Germany, 2,830,000; France, 83,000; and other foreign countries, 875,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total to the United Kingdom for 1930 having been only 34,839,000 bushels, while the five-year average ending with that year was 87,803,000 bushels. This compares with a five-year average over the same period of 73,194,600 for Canada.

Estimated gross average yearly British exports of wheat for the five years ended with 1930 amounted to 330,166,000 bushels. Canada which leads all wheat exporting countries had an average total of 257,663,000 bushels.

Estimated average world exports during the same period totalled 692,449,000 bushels. Argentina led among the foreign countries contributing to this total with an average of 149,785,000 bushels, with United States, Hungary, Algeria, Germany, Rumania, France and Russia, following next in order. Russia's average was 51,965,300 bushels.

## Alberta Delegates

Edmonton, Alberta.—Hon. George Hoodley, Minister of Agriculture, and Dean Howes of the university, will be the Alberta delegates to the meeting called by Hon. Robert Weir, federal minister of agriculture, for August 29 to Toronto.

## ADDRESSES SEED GROWERS

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan.

Mr. A. V. Vignier, secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

## Increased Acreage

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.—The prairie provinces have 1,042,278 more acres under wheat this year than last, according to a crop report issued by the Dominion Bureau of Statistics Wednesday, August 10.

For all Canada, the increase is 988,250 acres. The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June last through the rural schools are now available. The figures reveal an increase of 1,042,278 acres (four per cent.) in wheat, and 221,033 acres (2.7 per cent.) in oats, with slight decreases in barley and rye and a rather drastic reduction of 28 per cent. in flaxseed acreage from 618,461 to 445,263 acres.

## Menace To Health

Dental Authority Says Sugar and White Flour Injurious To Teeth

Toronto, Ont.—The coroner's jury stated a potential but unused credit which, through co-operation, might be utilized to great mutual advantage. To operate this credit most effectively, the super-market should be set up.

Asked for an interview during the dental convention he is attending here, Dr. Dewey said, "Just say this—it has been said a million times but it will stand plenty of repetition—white flour and white sugar are the big enemies to the teeth of civilized peoples. These are the culprits which are responsible for more ill-health as far as teeth are concerned than any two articles you could mention."

## PREFERENTIAL TARIFF ASSISTS EMPIRE TRADE

Ottawa, Ont.—Preferences granted by Canada to Empire imports amounted to \$30,000,000 during the year ended March 31, 1931, according to the preliminary report just issued. This was estimated as the difference between the duty collected under the preferential tariff and what would have been collected under a general tariff. The difference between the preference and treaty tariff would have been six million dollars less.

Total Empire imports for the year under the preferential tariff amounted to \$14,588,195. The duty collected amounted to \$1,125,220, at an average ad valorem rate of 12.5 per cent. The estimated duty for this volume under treaty tariff would have been \$14,546,980, and under a general tariff \$16,202,000. Of the total imports \$46,250,950 added to \$37,151,000 entered Canada free.

The great bulk of these imports came from the United Kingdom, the total being \$56,355,805, of which \$18,248,442 represented free imports. Duty collected on United Kingdom imports amounted to \$1,837,741.

The treaty tariff this would have been \$23,737,600, and under a general tariff, \$28,982,102.

The next largest importer to Canada, the British West Indies, sent goods valued at \$13,562,762, of which \$8,745,105 was valued, bringing a total of \$13,566,476.

Under a treaty tariff this would have been \$7,072,031, and under a general tariff, \$7,147,464.

## PROPOSAL MADE TO ESTABLISH EMPIRE BANK

Ottawa, Ont.—Establishment of a super-empire bank, represented in each participating country by a local office, was advocated by J. P. Darling, director of the Midland Bank of England, and well-known authority on finance.

The bank, Mr. Darling stated, would commence operations with a fund of approximately 100,000,000 pounds allocated to each participating country as agreed upon. This fund would be increased annually by three per cent. over the preceding year.

In a brief memorandum on Imperial co-operative credit and silver, forwarded by a newspaper interview, Mr. Darling went into his proposed plan. It was taken for granted, he said, that the plan was a potential but unused credit which, through co-operation, might be utilized to great mutual advantage. To operate this credit most effectively, the super-market should be set up.

## An Island Prison

Sons Of Freedom Are Being Established In New Quarters

Vancouver, B.C.—A little green island in the Gulf of Georgia became prison Thursday, August 10, to 29 Sons of Freedom who for the first time in the history of the province spent the next three years. They were sent over from Vancouver and will be followed by similar groups until the end of the year. The prisoners are settled in their place of confinement. In the meantime, some 300 of the prisoners could be cared for in provincial institutions.

Instead of spending the winter on the western plain where they have cold and snow in the southern interior, the Doukhobors will winter amid the soft rains of the mild coast climate. The prisoners will be housed in quarters surrounded by barbed wire ten feet high and may pursue their occupation of farming on the island, the women on the other.

## Jobless Veterans Offer Services To Bolivia

British Soldiers Would Join In Fight Against Paraguay

London, Eng.—Many unemployed veterans called at the Bolivian legation and consulate general here in response to an announcement of the British Fascist that a large number of British Fascists were prepared to join the Bolivian army in its dispute with Paraguay. They were courteously turned away, however, as recruits were not needed at present.

The consulate-general said it had received hundreds of requests from men desiring to offer their services, in addition to a "British Fascist" offer of 10,000 men if necessary.

## Optimistic At Eighty

Man From Ontario Quite Confident Of Winning Gold Strike

Winnipeg, Man.—Flat broke and 80 years of age, an optimistic traveller arrived in Winnipeg from Bracebridge, Ont. He visited the city hall and said he had hidden rummers here in search of work in the harvest field. He was not exactly looking for a meal ticket at the city hall, he said. He just wanted to look in and talk to some of the folk.

A blacksmith by trade, he said he had never missed a meal in his life and did not expect to. He was sure he'd find something to do in the west after the harvest.

## Prospectors Going North

Rush Started With Report Of Manitoba Gold Strike

Promised gold strike in the northwestern extremity of Elk Island are keeping in this northern Manitoba outfit. A state of progress is being joined in the rush from Island Lake and other mining men are making their way to the scene of the find by aeroplane.

The gold occurs in a tuffaceous in a small zone about the size of a football field and parallels the direction of the island. Elk Island is approximately 150 miles northeast of here.

## Radio Cars For Police

Vancouver, B.C.—For the past two months the Vancouver police department has experimented with radio equipped automobiles and a short wave sending station located near the headquarters. Some 20 cars have already been put in service and police officers are now being trained in the experiment has proven satisfactory.

## To Check

### Criminology

Scientific Treatment of Delinquency and Crime Inaugurated in England

A significant and encouraging movement has recently been launched in England in an effort to combat crime at its source. This movement is under the auspices of the Association for the Scientific Treatment of Delinquency and Crime, and has for its ultimate aim the founding of a National Institute for the prevention of crime.

There can be no question that the treatment of first offenders and of young criminally-disposed persons has much to do with the creation of the crop of criminals and the formation of habits and crime. To overcome the criminal tendencies of hardened criminals is admittedly a most difficult job, but this effort in England would appear to have in it the elements of hopefulness in that it strives to rescue the young person who is about to start out on a criminal career. Too much in the past it has been true that young people guilty of lapses against the welfare of society have been sent to prison when they might have been otherwise dealt with, and in prison have acquired confirmation and hardening of their tendencies until they have emerged as men and women with their hands against society and with society's hands against them. In this effort to which we have alluded it is intended that there shall be clearing stations, at which first offenders would undergo physical and psychological examination, and then be given treatment in clinics or re-education centers, without loss of freedom or stain upon reputation. In this way it would seem likely that many will be saved from a life of crime to useful citizenship.

Along such lines it would appear that there would be genuine likelihood of preventing the drain upon society's resources involved in the imprisonment of criminals, at least a certain proportion of whom would be re-established in good living. The experiment deserves all encouragement and is backed in England by great names of scientists and politicians. This experiment overseas should be observed by our Canadian authorities who have power to initiate the prevention of crime—Regina Leader-Post.

### Monkeys Are Neither Biped Or Quadrupeds

Four-Handed Like Bridge Game Says London Centennial Board

How many feet has a monkey? The question arose when a shipment of six of the chattering primates arrived at Folkestone from the continent. British tariff law admits quadrupeds without duty; other animals are taxed.

"Monkeys have four feet," the Londoners say while the simians were consigned away.

"No," ruled customs agents, "they have two feet and two hands."

Protesting against the "Customs agents' deficiency in zoological knowledge, the consignees appealed to the board of customs in London.

This sage board confounded them all.

"None!" Monkeys, they affirmed, are quadruman—(four-handed, like a bridge game).

So the poor monkeys haven't a foot to stand on, and neither has the appellate.

**Wood-Pulp Production**

Over three-quarters of the wood-pulp produced in Canada in 1930 was manufactured and used in mills which use their own pulp for the production of paper. About twenty-one per cent of the total quantity of pulp produced was made for export.

One thing that always has puzzled us is why these trick remedies that "cure" dandruff, etc., come in such large bottles.

In Oregon a loser in a gambling game can use the winner and recover double the amount he lost.

Young lady wants to know why a girl who is attentive to a boy is called her suitor. He is called her lover because he may or may not.

"Come down, boys, I am ashamed of you."

"You needn't be. We shall reach the top all right."—Fleegate Blast, Munich.

Manitoba had 165,000 sheep at the end of last year, Saskatchewan had 209,000, and Alberta, 614,000. Total 984,000.

## Branded Beef

Sales of Well-Finished Beef Have Been Greatly Boosted

The current lines of the Livestock and Meat Trade Review, prepared by the market intelligence service of the Dominion Livestock Branch at Ottawa, supplies some striking figures with respect to the extent to which sales of well-finished beef have been boosted through branding as provided under the federal beef grading service.

For the first four months of 1931, sales of branded beef are reported as totalling 5,032,396 pounds, while for the first four months of 1932 the total is 7,047,960 pounds—an increase of 2,015,564 pounds, or 40 per cent. Another way of presenting the same figures is to transpose this increase into terms of head of beef cattle, which, allowing an average dressed weight of 600 pounds each, amounts to 3,353 heads.

It is also of interest to note from this report that the volume of beef branded during the first four months of 1931 (1,430,017 pounds), is nearly two-and-a-half times the amount branded during the first four months of 1932. This figure, however, does not begin to represent the actual head of branded beef now being sold in Montreal as a great deal of the Montreal supply is dressed at Toronto and Winnipeg stockyards. Officials of the beef grading service estimate that about 30 per cent of all the beef being branded finds a market outlet in Montreal. This places the Montreal figure at upwards of 2,100,000 pounds.

The volume of branding in Canada in which beef is branded shows an increase in volume over last year, the largest increase in grading, outside of Quebec, is in Manitoba, which shows a gain of around 500,000 pounds during the first four months of the current year.

### Movie Wind Machine

Combats Brush Fires

Is Capable Of Putting Out Small Blazes Quickly

Blowing out brush fires as easily as a person might snuff out a match, a powerful wind machine, developed for a Hollywood motion-picture studio, has been used successfully in combating forest fires by the Los Angeles county forestry department.

Tests proved that the machine is capable of putting out any small blaze quickly, best results being obtained when dust and sand were blown into the stream of air from the propeller, thus smothering the flames.

The wind machine may be particularly valuable where no water is available and, if mounted on a tractor, could be taken into heavily overgrown territory, says Popular Mechanics Magazine. It is also proposed to direct the blast of air through a fan-shaped nozzle and, with compressed air, blow out by the roots brush and dry grass to cut fire breaks.

**Recipe For Keeping Young**

Be Keenly Interested In Everything Says Henry Ford

Henry Ford at 69 believes that if he continues to "keep interested in everything," old age will not bother him.

Celebrating his 69th birthday a few weeks ago, he said he believed that "people whose interests are up to date will get along in the world," without growing old.

"We like to have people think we get better as we get older," said Mr. Ford, "and I believe people of these times have more varied interests to keep them young."

The motor manufacturer expressed the belief that business conditions will gradually improve as people do more for themselves and cease looking to the Government or some Santa Claus for aid.

**Winds Get Their Turn**

Recently the last river mail boat on the Mississippi closed fifty years of continuous service between Memphis and Mayfield, Tenn. The same day a post-office bulletin called attention to the fact that 12,000 pounds of 553,000 pieces of mail had been sent via air during the first year of air mail at Memphis. The waters receive a well-deserved rest, but the winds are just beginning to work.

"I have only ten minutes and I hardly know where to begin," said the speaker.

"Begin at the ninth minute," shouted a bored man in the back of the audience.

Young lady wants to know why a girl who is attentive to a boy is called her suitor. He is called her lover because he may or may not.

## Magicians Of The Past

Showmen's Illusions That Mystified Crowds Of A Former Generation

Many of the most renowned magicians, who entertained crowded theatres in the last century and were inventors of so many tricks, Kellar, Hermann the Great and, later, Thurston made the machinery which they employed in the most puzzling of their illusions. Thurston spent years in perfecting the "Levitated Lady," in which a young woman appeared to be suspended in the air.

The trick of the speaking head, in which the head of a girl, severed from the body and floating in space, continued to carry on conversation, took years to bring to complete success, yet it also was of simple construction. Magicians are a clanish lot, and they keep as sacred trusts their own secrets and those of members of their guild. That these secrets became known to the world is not because they are entrusted to the Patent Office, but because some one eventually proves as smart as the inventor.

One of the striking features of a travelling show in the '90s was the "Falling Automaton," a figure in a glass case that answered questions and solved mysteries. It was the most successful attraction and brought down the wrath of a competitor, a combination referred to it as a "quadrupole fake." If the secret of the trick really had been discovered, as he claimed, the "secret of artificial speech" he might have shared honors with Edison. When he did to conceal a dwarf between the two layers of the floor of the case and make him the multiplicity of the trick.

One of the illusions of another magic age was to raise a flaming wand and cause the falling of the rain and cause the falling of the rain. He was chemist enough to know the value of phosphorus as a showman's magic. Magic has lost much of its luster as an entertainment. Science does on a grand scale what the magician did as an exhibition of mystery. Compare the magic of a handkerchief being pulled as a person might snuff out a match, a powerful wind machine, developed for a Hollywood motion-picture studio, has been used successfully in combating forest fires by the Los Angeles county forestry department.

Tests proved that the machine is capable of putting out any small blaze quickly, best results being obtained when dust and sand were blown into the stream of air from the propeller, thus smothering the flames.

## Calendar Is Left Behind

Father Time Springs Ahead Six Hours

Every leap year laymen and scientists alike have the opportunity of watching the effects of the calendar to catch up with Father Time. Once in four years our antiquated calendar must somehow gain a day to make up six hours lost each year. This it does partially by adding a day on what we know as Leap Year. Still the calendar does not quite catch up in the race. There is still seven minutes and fourteen seconds left unaccounted for each year. Thus there exists centennial leap years, where another day is added. These Leap Years, now almost forgotten, are those centuries exactly divisible by 400. Three out of four centuries, 1700, 1800, and 1900 are common years, but 2000 is a Leap Year. This plan matches the solar year within twenty-six seconds.

**Receives New Title**

New title has been added to the already imposing list of the Prince of Wales; that of Commodore. He consented to become Commodore of the Royal Thames Yacht Club, which is the second oldest club of its kind. Lord Queensborough retiring to make way for him.

**Conductor—"Can't you see the sign, No smoking?"**

Sailor—"Burr, mate, that's plain enough. But they's so many dippy signs here. One says, 'Wear No Cigarettes.' So I ain't payin' attention to any of them!"

**Doctor: "Now, before I examine you, may I ask you to drink?"**

Patient: "Thank you, doctor. A small whiskey and soda for me."

**QUEBEC'S CLEAR SKIES FAVORABLE FOR OBSERVATION**

"This is just the kind of sky we want to observe the eclipse satisfactorily." Sir Frank Dyson, Astronomer-Royal, and other British astronomers and scientists, told reporters when they arrived at Quebec on the liner "Montcalm." They have come to Canada to observe the total eclipse of the sun at various points in New England, and are divided into four separate parties, going to Magog and Parent, Quebec Province; and Berlin, New Hampshire, and Matlock, Me. The celebrated astronomers are seen pointing to Quebec's coast. The group included Sir Frank Dyson, leader of the Royal Astronomical Society's Expedition (left, pointing); J. F. Cameron, Royal Physics Observatory, Cambridge; Prof. J. F. M. Stratton and Prof. H. Dingle, of the Imperial College of Science and Technology.

## Italia Her Likely

To Receive Fortune

Case Has Been In Courts For Sixty-Five Years

To inherit a million in money left by an ancestor 352 years ago does not fall to the lot of every man. But this is the happy end of a case which the courts of Italy have been trying since 1867 and it seems that a certain Giovanni Trombetta, postal clerk at Milan post office, gets the lion's share of the fortune after living 65 years in a very modest way. In the year 1660 Baron Antonio Trombetta, who had vast funds at Montebello Juncio, in Calabria, left them all in trust to neighboring Caputo monks, founded an abbey for them and gave them his farm buildings too. It seems that the baron had quarrelled with his family, which consisted of a mother who had married and her two sons by her second husband.

When, in 1866, the monasteries were to a great extent secularized, and the monks' fortune which had increased a hundredfold, was not claimed by his kin, and the Italian government, according to law, took possession of it.

Then the descendants of the baron's half brothers, who had grown poor, and came down to the humblest class of society, appeared and made their claims. Of these there were 70 persons, but the courts decided that 40 and now the chief heir is Giovanni Trombetta.

The money will soon be handed over to him, but the state kept a considerable portion of the whole estate and some down to the humblest class of society, appeared and made their claims. Of these there were 70 persons, but the courts decided that 40 and now the chief heir is Giovanni Trombetta.

## All-Canadian Highway

Completion Is Expected In About Two Years' Time

Preaching the gospel of the vital need of good roads, everywhere in Canada, Samuel I. Squire of Toronto, chairman of the Canadian Good Roads Association, recently returned from the Pacific coast. "In two years' time Canadians will be able to travel across the Dominion on an all-Canadian Highway with the exception of a short break for the lake journey, from Port William to Kincora on to Port William. But progress is being made.

ST. CHARLES MILK  
UNWEETENED (EVAPORATED)

THE HOUSE OF  
DREAMS-COME-TRUE

BY MARGARET FEDLER  
Author of "The Splendid Policy," "The Herald of the Moor," "Holler & Blomgren, Ltd., London."

CHAPTER XXVIII.—Continued

"Oh, yes, she did. It was quite clear in the afternoon when she started looking like being a lovely night."

"But—but—"

Nick stammered and came to a halt. There was a look of bewilderment in his eyes.

"But who she goes with?" he demanded at last. "I thought she said she intended stopping the night with Judith and Burke at their bungalow."

"So she did," replied Blaise. "Why? Have you any objection?"—smiling.

"No, only—Nick frowned—"I don't quite understand it. Judith isn't on the Moor."

"Not on the Moor?" broke simultaneously from Lady Anne and Blaise.

"How do you know, Nick?" added the latter gravely.

"Why because—Nick's face wore an expression of puzzled concern—"because I saw Judith in Newton Abbott late this evening."

Blaise leaned forward, a sudden look of concentration on his face.

"You saw Judith?" he repeated.

"What time?"

"It must have been nearly eight o'clock."

"I was buzzing along in Jim Cresswell's car to catch the seven-fifty-up train, and I saw Judith with one of the Howards—two women, those people from London—turning into the gateway of home. I expect it was the place the Howards are stopping at. They didn't see me."

"You're quite certain? You've made no mistake?" said Blaise sharply.

"Of course I've made no mistake. Think I don't know Judy when I see her? But what's the meaning of it, Blaise?"

Torminar rose to his feet, tossing the stump of his cigarette into the fire.

"I'm not sure," he said slowly. "But I'm going to find out. Madonnas"—turning to his mother—"did Jean tell you exactly what she was doing when she ran her up on the 'phone about this moonlight plan?"

"It was Judith who rang up," replied Lady Anne, a faint misgiving showing itself in her face. "It was Geoffrey who gave the message."

Torminar looked at her vaguely, then answered expression in his eyes.

There was a knock at the door. Torminar was looking at her, too—keenly.

The expression of a man who, all at once, sees something that is more than anything in the whole world being torn from him—dragged forcibly away from the shelter he could give into some unpublishable darkness of disaster.

"That settles it," he pressed his finger against the bell and held it there, and when Blaise came hurrying in response to the imperative summons, he said curtly: "Order a fresh horse round at once—at once, mind. Tell Harding to saddle Orion, and to look sharp about it."

"Blaise—Lady Anne's obvious uneasiness had deepened to a sharp anxiety—"Blaise, what are you going

to do? What—what are you afraid of?"

He looked her straight in the eyes.

"I'm afraid of just what you are afraid of, madonnas—the devil let loose in Geoffrey Burke."

"And—and you're going to look for her—for Jean?"

"I'm going to find her," he corrected quietly.

Gravely had set its seal on all three faces. Each was conscious of the same fear—the fear they could not put off words.

"But why do you take Orion?"

"Because I shall be able to find the mare—Redwing—would do the journey quicker and be lighter of foot over any marshy ground on the Moor."

"Orion can go when he chooses," returned Torminar. "And he'll choose tonight. Redwing is a little bit of a thing, though she's game as a pebble. But she couldn't carry—two."

The significance of Torminar's choice of his big roan hunter, three parts thoroughbred and standing sixteens hands, came home to Nick. He nodded without comment, and then—

Silently he and Lady Anne accompanied Blaise into the hall. From the gravelled drive outside came the impatient stamping of Orion's iron-shod hooves. Just at the last Lady Anne clung to her son's arm.

"You'll bring her back, Blaise?" she urged, a quiver in her voice.

"I'll bring her back, madonnas," he answered quietly. "Don't worry."

A minute later he and the great roan horse were left to the light in the dark of the night. Only the beat of his hooves was heard as he turned back to the two who were left to watch and wait, muffled and vague through the shrouding mist like the sound of a distant drum.

## CHAPTER XXIX.

## The Golden Hour

Orion had fully justified Blaise's opinion of his capabilities. As though the great horse had gathered his senses, there was trouble about to which he must not add, he had needed neither the spur nor the whip. He had taken his master with long, sweeping strides over the miles that lay between Blaise and the Moor. He was as fresh as paint, and the rush through the cool night, under a rider with hands as light as a woman's and who sat with a flexible ease that no other rider could match, had not disturbed him in the very least.

Now they were climbing the last long slope of the white road that approached the bungalow, the reins lying loosely on Orion's neck.

Blaise had had a little in the places, and a watery-looking moon appeared through the clouds now and again, throwing a vague, uncertain light on the blurred and sombre moorland.

Torminar had no very definite plan of campaign in his mind. He felt convinced that he should find Jean at the bungalow. If, contrary to his expectation, she were not there, nor anyone else to whom he could apply for information as to her whereabouts, he would have to consider what his next move must be.

Meanwhile, his thoughts were preoccupied with the main fact that she had failed to return home. If she had accepted Burke's invitation to the bungalow, believing that Judith and the Howards would be of the party, how was it that she had not at once returned when she discovered that for some reason they were not there?

Some weeks ago—during the period when she was definitely investigating the possibilities of an "amalgamoid bomb"—it was quite possible that the queer recklessness which sometimes tempts a woman to experiment in love, and to see just how far she may go—the mysterious delight that the feminine temperament appears to find in the chase on the edge of a precipice—might have induced her to remain and have tea with Burke, chaplain or no chaplain. And then it would have been all over. But Burke's lawless disregard of anything in the world except the fulfilment of his own desire, and his engineering the great, and he might have detained her at the bungalow against her will.

But Blaise did not believe that a "lete-ete" tea with Burke would hold any attraction for Jean now—nor since that day, just before the visit to the Moor, when he and she had been discussing the affairs of Nick and Claire and had found, quite suddenly, that their own hearts were open to each other and that with the spoken word, "Beloved," the misunderstandings of the past had faded away, to be replaced by a wordless trust and belief.

But if it "had" attracted her, if—knowing precisely how much the man she loved would condemn—she had still deliberately chosen to spend an afternoon with Burke, why, then, she would have returned with a swift pang that she was no longer his Jean at all but

some other, lesser woman. Never again the "little comrade" whose crystalline honesty of soul and sensitive response to all that was sweet and wholesome and true had come into his secret life to jewel its arid places with a new blossoming of the rose of love.

He tried to thrust the thought away from him. It was just the kind of thing that Nesta would have done, playing off one man against another with the innate instinct of the born coquette. But not Jean—not Jean of the candle eyes.

Presently, through the thinning mist, Torminar discerned the sharp turn of the track which branched off from the road towards the bungalow, and quickening Orion's pace, he was soon riding up the steep ascent, the moonlight throwing strange, confusing lights and shadows on the mist-wet surface of the ground.

Suddenly, without the slightest warning, the road seemed to curve around, shying violently away from the off-side bank. A less good horseman might have been unsettled, but as the big horse swerved Torminar's knees gripped against the saddle like a vice, and with a steady word he forced him up the track again, then glanced keenly at the overhanging side of the roadway to discover what had frightened him.

A moment later he had jerked Orion to a sudden standstill, leapt to the ground, and with the reins over his arm, crossed the track back to the where, dead in some light stuff that glimmered strangely in the moonlight, lay a slender figure, propped against a tree.

"Blaise!" Jean's voice came weakly to his ears, but with a glad note in it of immediate relief that bore witness to some previous strain.

In an instant Torminar was kneeling beside her, one arm behind her shoulder. He helped her to her feet and she leaned against him, shivering. Flinging his pockets, he produced a brandy bottle and held it out to her. "Drink some of that," he said. "Don't try to tell me anything yet."

The raw spirit sent the chilled blood racing through her veins, putting new life into her. A faint tinge of colour crept into her face.

"Oh, Blaise, I'm so glad you've come—so glad!" she said shakily.

"So am I," he returned grimly. "See, drink a little more brandy. Then you shall tell me all about it."

At last, bit by bit, she managed to give him a somewhat disjointed account of what had occurred. It seemed, she said, that she had been sitting in the bungalow when she heard a faint knock. "I think I must have been stumped a little when I fell," she said. "I can't remember anything after stopping right off into my room. It seemed, I think, afterwards—I found myself lying here. And when I tried to stand, I found I'd hurt my ankle. I don't know what I did, but I couldn't get up. I couldn't put my foot to the ground. So with a weak little attempt at laughter—"I—I just sat down again."

"I think I must have been stumped a little when I fell," she said. "I can't remember anything after stopping right off into my room. It seemed, I think, afterwards—I found myself lying here. And when I tried to stand, I found I'd hurt my ankle. I don't know what I did, but I couldn't get up. I couldn't put my foot to the ground. So with a weak little attempt at laughter—"I—I just sat down again."

"Oh, it's nothing, really," she repeated, but she should find Jean at the bungalow. But that she couldn't walk on it. Then, suddenly, clinging to him with a nervous dread: "Oh, take me away, Blaise—take me home!"

"I will. Don't be frightened—there's no need to be frightened any more, my Jean."

"No, I know. I'm not afraid—now."

He could hear the sob of utter nerve stress and exhaustion back of the brave words.

"Well, I'll take you home at once," he said cheerfully. "But, look here, you've no coat on your wet with rain."

"I know. My coat's at the bungalow. I left it in a hurry, you see."

Whimsically. The irrepressible Torminar element, game to the core, was reasoning.

"Well, I must fetch it—"

"No! No!" Her voice rose in hoarse protest. "I won't—I can't go back!"

"Then I'll go."

"No—don't! Geoffrey might be there—"

"So you know the better!" grimly. "I take five minutes with him. Torminar's hand tightened fiercely on the hunting-crop he carried. "But he's more likely to let his way in the morning, and fetched up far enough away. Probably—with a short laugh—he's still searching for Dartmouth. For you'd be his mind a bit, you know! Wait here a minute while I ride up to the bungalow—"

But she clung to his arm.

"No, no! Don't go! I can't be left alone—again."

The last was coming back to her voice and Blaise, detecting it, abandoned the idea at once.

"All right, little Jean," he said reassuringly. "I won't leave you. Put my coat round you—stripping it off. There—like this." He helped her into it and fastened it over her dress. "And now I'm going to get you up on to Orion and we'll go home."

"I shall never get up!" she observed, with a glance at the room's

## St. Boniface Priest Builds Fine Organ

Instrument is Marvel of Tonal Richness and Sweetness

A workshop which might well rival those of his priestly confreres of the middle ages is maintained by Brother Sylvester, of the Oblate order, in St. Boniface. In his workshop, Brother Sylvester, during his spare time in the past 12 months, has built a beautiful two-manual, pneumatic-action organ, perfect in degree of quickness and sensitiveness.

The instrument is designed along the same lines as Casavant Pianos and is a marvel of tonal richness and sweetness. It is a product of great natural genius, rare skill and hours of labor.

Brother Sylvester is a Frenchman by birth. He came to Canada in 1881 from his native Sisy, where his parents had apprenticed him to a blacksmith. On his arrival in Canada he was for 10 years in the service of the Oblate Order as a builder of mission schools and buildings in northern Canada.

It was in 1910 that he became interested in musical mechanics and for some years he has enjoyed a reputation as a maker of high-grade piano and chromatic accordions, work which gave him valuable training for the more difficult task which has now reached a consummation.

What Brother Sylvester will do with his organ now that it is completed he has not decided. He may present it to some mission in the far north, but he seems object to that since only highly skilled musicians could play it and such are not to be found in that area of French-Canadian missions.

Canada has no border patrol in British Columbia.

Hundreds of "floaters" from the state of Washington, practically all of them United States citizens, are reported drifting across the international boundary into British Columbia, with Vancouver generally as their destination.

Canada maintains no border patrol in British Columbia and crossing of the boundary outside the recognized gateway is an easy matter.

All mothers can put away anxiety regarding their suffering children when they have Mother's Worm Expeller to give relief. Its effects are sure and lasting.

## Easy To Get Across

## Chinaman Won Out

A Chinese gardener sold a horse to a farmer, and during the transaction he repeatedly said: "Horse no look well, but plenty pull."

He was subsequently discovered that the animal was blind, and, increased at being taken in by a Chinese, the purchaser called him up to court.

Did you know the horse was blind?" asked the magistrate.

"Oh, yes, I know long time," John replied.

"Then why didn't you tell him so?" the magistrate demanded.

"I tell him all," said the Chinese. "I tell him plenty time horse no look well."

That being admitted, the case was dismissed.

## Important Minerals Of Canada

Sixteen important minerals produced in Canada are listed by the Canadian Government Bureau of Statistics in a recent report. They include: asbestos, cement, clay products, coal, copper, feldspar, gold, gypsum, iron ore, lime, natural gas, nickel, petroleum, salt (commercial), silver and zinc.

Smithson: "How long have you worked in that office?"

Groene: "Since they threatened to fire me."

The life of a single hair on a human head is estimated to be from six to 10 years.

## Little Helps For This Week

First the blade, then the ear, after that the full corn in the ear. —Mark iv, 28.

At noise, but thrive unseen and dumb.

Keep clean, bear fruit, earn life, and watch.

Till the white-winged reapers come. —Henry Vaughan.

The Author and Giver of all good things expects us to grow and improve. He offers to increase in us true religion, to nourish us in all goodness.

The gospel is a call to progress and improvement; it bids us never tire in our works of charity, but as fast as one kind purpose is accomplished set about another. Let charity, gentleness, and love be as the breath you draw. —John Keble.

What is thought the earliest mention of the egg as food is found in the book of Job. In Job 6:6 it is said: "For every taste in the white of an egg."

A railway season ticket, covering 175 miles of travel, was issued to a dog, at Plymouth, as it could accompany its mistress, a travelling saleswoman, on her trips.

Thirty-five thousand women in Aberdeen are unmarried. They should import a Northwest Mounted policeman to show them how to get their man.

### DOES THE U.P.A. SAVE MUCH BY SHIPPING IN TWINE?

"This is the time of the year when  
twine is being distributed to the farm-  
ers by various dealers, including the  
U.P.A. There are four dealers in town  
this year with cartloads of twine in  
stock and everyone expects to get a  
share of the twine business. However,  
the U.P.A. members are not content  
with this, but have ordered a car of  
this product and are selling it at ten  
cents per hundred pounds less than the  
other dealers. Is this fair to the local  
dealers? We have already noticed the  
U.P.A. and its undertakings, but for  
the little they save we believe they  
would be much better off to leave the  
twine orders for the local dealer as  
long as he sells it at a fair price. The  
U.P.A. is not giving the dealer any-  
thing in the long run. These dealers

## TOWN & COUNTY Personalographs

elevator at Carbon again. The new  
agent is Mr. Clarke.

Oliver Garage has disposed of two

are all machine agents and merit be-  
cause by carrying in stock and  
trade repairs and other necessities to  
make harvesting operations lighter for  
the average farmer. To keep this stock  
the dealers must depend on other lines  
of profit to keep them in existence and  
twine is one of them.The average farmer will probably  
save from fifty cents to \$1.00 by buy-  
ing his twine through the U.P.A. The  
delay for machine parts would cost  
him more than that if he had to order  
supplies from other places.  
Mr. Farmer! Be fair to your machine  
agents. Do not bring in products at  
a lower price when it means so little  
to you. Farmers rendered by the agent  
will more than pay for the saving you  
anticipate, but do not make in the long  
run.

cutting. Jacob has a good crop this  
year, although it is down from the re-  
cent year. We trust that he will suc-  
cessfully harvest this crop of his.

sities... priced so reasonable that  
they quickly pay for themselves in  
the time and labor-saving service  
and satisfaction they give.

Model 4A

THE INSTANT-GAS IRON "Smooths the Way on Ironing Day".  
Saves time, work, and clothes. Lights instantly... no waiting. Has  
Roto-Type Generator with cleaning needle which can be operated  
while iron is burning. Double-pointed... same perfect results on  
forward and backward strokes. Tapered ironing base makes it easy  
to iron under buttons. Use it anywhere... no cords or wires.

## Coleman

INSTANT-GAS APPLIANCES

THE SPORT-LITE LANTERN — It's an instant-  
lighting... single mantle type. Just the light for  
any camping trip or outdoor task. Small in size  
but big in brilliance. Weighs only 3 lbs., yet gives  
up to 150 candlepower of pure white light. Pyrex  
glass globe protects mantle. Has built-in pump and  
many features of larger lanterns. It's a Double-Duty  
lantern for use indoors or out.THE COLEMAN LAMP AND STOVE COMPANY, Ltd.
